Proposal Name Tuolumne - Stanislaus Integrated Regional Water Management Planning Grant *

Proposal Objective The Tuolumne-Stanislaus (T-S) Integrated Regional Water Management (IRWM) Region is seeking planning grant funding for the development of a T-S IRWM Plan. The grant funding will be used to further define the issues/conflicts such as water quality impacts from septic systems, cattle grazing, and other sources; water supply and water quality impacts from urbanized areas drainage; local resource impacts due to water leaving the watershed; water supply impacts caused by use planning/growth; water use efficiency to comply with recent legislation; and aquatic and terrestrial ecosystems impacts. Some of the major elements to be deliberated during the T-S- IRWM plan preparation process will include: a. Identification of regional partnerships that can result in long-term, sustainable resource management strategies (RMS) to prevent recurrence of the issues/conflicts summarized above. b. Evaluation and minimization of impact of continued water exports to watershed and local water supply. c. Engagement of the T-S- IRWM Region's DAC and tribal communities. d. Development of an interregional outreach strategy. The strategy will include a sustainable system of communications, coordination and planning in appropriate venues. It is anticipated this will include those areas outside the region that directly benefit from the resources of the T-S Region. The outreach strategy will also include adjoining and other appropriate IRWM Regions. A focus will be to develop cooperative partnerships in managing resources within the T-S Region. e. Development of a data management strategy and implementation of a Phase I Data Management System to provide information for adaptive management of RMS implementation and improvement, and to feed into the State Water Plan. f. Development of an IRWM Plan structure and community infrastructure capability that would make the Plan a sustainable component of the local and regional planning and conflict resolution venues. *
